Safe harbour statements

CERTAIN STATEMENTS AND INDICATIVE PROJECTIONS (WHICH MAY INCLUDE MODELED LOSS SCENARIOS) MADE IN THIS RELEASE OR OTHERWISE THAT ARE NOT BASED ON CURRENT OR HISTORICAL FACTS ARE FORWARD-LOOKING IN NATURE INCLUDING, WITHOUT LIMITATION, STATEMENTS CONTAINING THE WORDS "BELIEVES", "ANTICIPATES", "PLANS", "PROJECTS", "FORECASTS", "GUIDANCE", "INTENDS", "EXPECTS", "ESTIMATES", "PREDICTS", "MAY", "CAN", "LIKELY", "WILL", "SEEKS", "SHOULD", OR, IN EACH CASE, THEIR NEGATIVE OR COMPARABLE TERMINOLOGY. ALL SUCH STATEMENTS OTHER THAN STATEMENTS OF HISTORICAL FACTS INCLUDING, WITHOUT LIMITATION, THE GROUP'S FINANCIAL POSITION, LIQUIDITY, RESULTS OF OPERATIONS, PROSPECTS, GROWTH, CAPITAL MANAGEMENT PLANS AND EFFICIENCIES, ABILITY TO CREATE VALUE, DIVIDEND POLICY, OPERATIONAL FLEXIBILITY, COMPOSITION OF MANAGEMENT, BUSINESS STRATEGY, PLANS AND OBJECTIVES OF MANAGEMENT FOR FUTURE OPERATIONS (INCLUDING DEVELOPMENT PLANS AND OBJECTIVES RELATING TO THE GROUP'S INSURANCE BUSINESS) ARE FORWARD LOOKING STATEMENTS. SUCH FORWARD-LOOKING STATEMENTS INVOLVE KNOWN AND UNKNOWN RISKS, UNCERTAINTIES AND OTHER IMPORTANT FACTORS THAT COULD CAUSE THE ACTUAL RESULTS, PERFORMANCE OR ACHIEVEMENTS OF THE GROUP TO BE MATERIALLY DIFFERENT FROM FUTURE RESULTS, PERFORMANCE OR ACHIEVEMENTS EXPRESSED OR IMPLIED BY SUCH FORWARD-LOOKING STATEMENTS.

THESE FACTORS INCLUDE, BUT ARE NOT LIMITED TO: THE GROUP'S ABILITY TO INTEGRATE ITS BUSINESSES AND PERSONNEL; THE SUCCESSFUL RETENTION AND MOTIVATION OF THE GROUP'S KEY MANAGEMENT; THE INCREASED REGULATORY BURDEN FACING THE GROUP, THE NUMBER AND TYPE OF INSURANCE AND REINSURANCE CONTRACTS THAT THE GROUP WRITES OR MAY WRITE; THE GROUP'S ABILITY TO IMPLEMENT SUCCESSFULLY ITS BUSINESS STRATEGY DURING 'SOFT' AS WELL AS 'HARD' MARKETS; THE PREMIUM RATES WHICH MAY BE AVAILABLE AT THE TIME OF SUCH RENEWALS WITHIN THE GROUP'S TARGETED BUSINESS LINES; THE POSSIBLE LOW FREQUENCY OF LARGE EVENTS; POTENTIALLY UNUSUAL LOSS FREQUENCY; THE IMPACT THAT THE GROUP'S FUTURE OPERATING RESULTS, CAPITAL POSITION AND RATING AGENCY AND OTHER CONSIDERATIONS MAY HAVE ON THE EXECUTION OF ANY CAPITAL MANAGEMENT INITIATIVES OR DIVIDENDS; THE POSSIBILITY OF GREATER FREQUENCY OR SEVERITY OF CLAIMS AND LOSS ACTIVITY THAN THE GROUP'S UNDERWRITING, RESERVING OR INVESTMENT PRACTICES HAVE ANTICIPATED; THE RELIABILITY OF, AND CHANGES IN ASSUMPTIONS TO, CATASTROPHE PRICING, ACCUMULATION AND ESTIMATED LOSS MODELS; INCREASED COMPETITION FROM EXISTING ALTERNATIVE CAPITAL PROVIDERS, INSURANCE LINKED FUNDS AND COLLATERALISED SPECIAL PURPOSE INSURERS AND THE RELATED DEMAND AND SUPPLY DYNAMICS AS CONTRACTS COME UP FOR RENEWAL; THE EFFECTIVENESS OF THE GROUP'S LOSS LIMITATION METHODS; THE POTENTIAL LOSS OF KEY PERSONNEL; A DECLINE IN THE GROUP'S OPERATING SUBSIDIARIES' RATING WITH A.M. BEST, STANDARD & POOR'S, MOODY'S OR OTHER RATING AGENCIES; INCREASED COMPETITION ON THE BASIS OF PRICING, CAPACITY, COVERAGE TERMS OR OTHER FACTORS; A CYCLICAL DOWNTURN OF THE INDUSTRY; THE IMPACT OF A DETERIORATING CREDIT ENVIRONMENT FOR ISSUERS OF FIXED INCOME INVESTMENTS; THE IMPACT OF SWINGS IN MARKET INTEREST RATES AND SECURITIES PRICES; A RATING DOWNGRADE OF, OR A MARKET DECLINE IN, SECURITIES IN ITS INVESTMENT PORTFOLIO; CHANGES IN GOVERNMENTAL REGULATIONS OR TAX LAWS IN JURISDICTIONS WHERE THE GROUP CONDUCTS BUSINESS; ANY OF THE GROUP'S BERMUDIAN SUBSIDIARIES BECOMING SUBJECT TO INCOME TAXES IN THE UNITED STATES OR THE UNITED KINGDOM; THE INAPPLICABILITY TO THE GROUP OF SUITABLE EXCLUSIONS FROM THE UK CFC REGIME; AND ANY CHANGE IN THE UK GOVERNMENT OR UK GOVERNMENT POLICY WHICH IMPACTS THE CFC REGIME.

ALL FORWARD-LOOKING STATEMENTS IN THIS RELEASE SPEAK ONLY AS AT THE DATE OF PUBLICATION. LANCASHIRE EXPRESSLY DISCLAIMS ANY OBLIGATION OR UNDERTAKING (SAVE AS REQUIRED TO COMPLY WITH ANY LEGAL OR REGULATORY OBLIGATIONS INCLUDING THE RULES OF THE LONDON STOCK EXCHANGE) TO DISSEMINATE ANY UPDATES OR REVISIONS TO ANY FORWARD-LOOKING STATEMENTS TO REFLECT ANY CHANGES IN THE GROUP'S EXPECTATIONS OR CIRCUMSTANCES ON WHICH ANY SUCH STATEMENT IS BASED.

Lancashire Group

Sticking to the Strategy, Managing the Cycle

- “Lancashire's strategy since day one has always been to write the most exposure in a hard market and the least in a soft one. There are now abundant reinsurance and retrocession opportunities that allow us to maintain our core insurance and reinsurance portfolios, whilst significantly reducing net exposures and enhancing risk adjusted returns. From our peak exposures in April 2012, when losses had driven substantial market hardening, we have reduced exposures across the board. We will stick to our strategy in the knowledge that when an event comes, we are well prepared through all three of our platforms to take advantage of subsequent opportunity”

Alex Maloney

- Lancashire’s strategy is designed to be robust across all phases of the market cycle and with the Kinesis and Cathedral platforms there are multiple ways to maintain or enhance the portfolio

Sticking to the Strategy, Managing the Cycle

- Multiple platforms able to offer full spread of security to clients as they look to different options – rated company, Lloyd's, collateralised
- Diversified across classes and between specialist insurance/reinsurance classes - no reliance on a single dominant source of revenue or profit
- Disciplined underwriting – LICL/LUK have the daily UMCC call, Cathedral daily exception reporting
- Sticking to strategy – least net exposure in soft market – but able to retain most of core inwards portfolio through outwards optimisation
- Well placed to manage the cycle with volatile lines balanced by substantial weighting to low attritional loss ratio lines
- Investment stance has a slight risk on bias, focus remains on managing interest rate risk in current environment
- Special dividend of \$0.50 announced at Q4 results, total capital return since inception of \$2,290.7 million equal to 234.1% of original IPO capital raised
- Full year combined ratio of 68.7% for 2014. Q1 2015 combined ratio of 72.0%

Changes from last year – what's new?

- **New CEO**

- Alex Maloney took over from Richard Brindle as the CEO of the Group on April 30, 2014
- Alex joined Lancashire in December 2005 and had led the Group's underwriting operations since May 2009
- Paul Gregory named Group CUO and Hayley Johnston named CUO of Lancashire Insurance Company (UK), both internal appointments and longstanding employees

- **Integration of the Cathedral Group**

- Incorporated CUL exposures in stochastic modeling of PMLs and aggregation of RDSs
- Build out of Syndicate 3010, increased stamp capacity from £30 to £100 million
 - Added energy and terrorism lines written by the Lancashire teams – gross premium written of \$34.9 million in first 12 months following Lloyd's approval
 - Added direct aviation hull and liabilities and aviation war lines written by two new underwriting teams hired in 2014 – gross premium written of \$12.1 million since the team arrived in July 2014
- Lancashire UK and Cathedral now share one office location in London
- 3 Cathedral partners sit on the Group Executive Committee, one on the RRC

Changes from last year – what's new?

- **Restructured Lancashire reinsurance program for 2015**
 - Non-marine retrocession program moved from a single-limit, aggregate basis in 2014 to a more capital-efficient, reinstatable, occurrence based program in 2015, with an additional \$20 million of limit and attaching \$50 million lower down
 - Expanded our marine, energy and terrorism reinsurance facilities, buying more limit at lower attachment points. For the first time we were able to cover Gulf of Mexico wind for Energy
 - 2 new facilities added – a North East QS and a top layer wrap. These facilities allow us to maintain our inwards portfolio positions on our property catastrophe programme while reducing our exposure with over-riders
- **Kinesis renewals at January 1, 2015**
 - \$262 million of limit written at January 1 renewals at an average rate on line only marginally reduced from prior year
 - All January 2014 contracts were renewed; 2 new contracts added
 - 4 new investors added to the club, including Kinesis' first family office investor
 - \$5.1 million in profit commission earned by Lancashire in Q1 2015 from January and February 2014 underwriting cycles with an additional \$0.7 million expected in Q2 2015
- **Hedge fund portfolio and tail risk hedge**
 - Interest rate risk managed by further diversification – now 30.6% ⁽¹⁾ of portfolio in floating rate and non-fixed income asset class versus 19.2% in 2013

⁽¹⁾ As at March 31, 2015

Very strong results for 2013, 2014 and Q1 2015...and since inception

Consistent performance to date – TVC and volatility

Five year Total Value Creation CAGR (Q4:09 to Q4:14)

- From Dowling and Partners (D&P) analysis, Lancashire shows limited volatility and strong consistency of results
- Shows limited volatility on both sides of the balance sheet:
 - Most Bermuda catastrophe company averages are below ours, with more downside, less upside
 - UK Lloyd's companies are more leveraged therefore bigger spread of results – good years are good but bad years worse
- Lancashire missed the significant investment gains others made in 2009, as we didn't incur the losses our peers suffered in 2008. In 2011 with the magnitude of international property catastrophe losses, Lancashire fared substantially better than peers

Marine	87%	13%	98%	2%
Aviation	60%	40%	63%	37%
All classes	71%	29%	90%	10%

⁽¹⁾ Renewing business: All renewals including like for like and those with substantive changes to layers, terms and conditions

⁽²⁾ New business: Business not written in the prior policy period which can include new layers/sections on renewal accounts

⁽³⁾ Core business: Business that we expect to renew over the long term meeting our RoE hurdles through the cycle with a strong client relationship

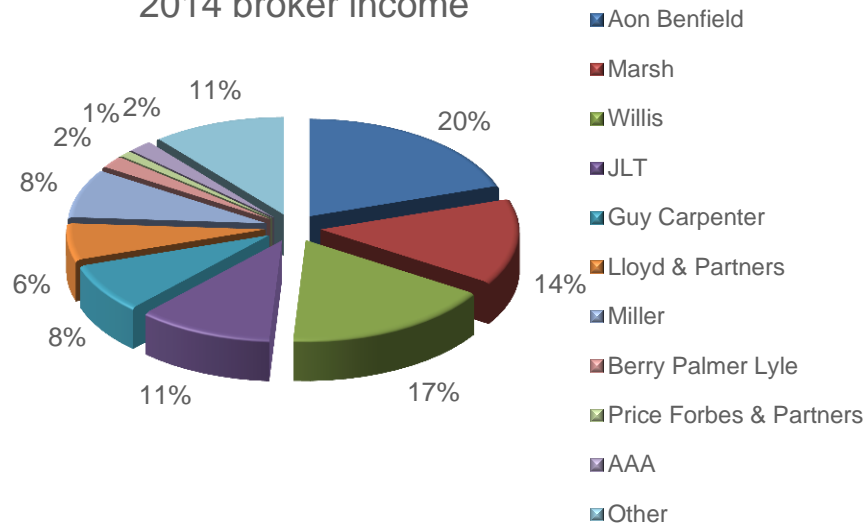

⁽⁴⁾ Opportunistic business: Business that may or may not renew and is written because of favourable current pricing, terms and conditions

Based on 2014 portfolio, excluding Lloyd's segment, as of December 31, 2014

2014: Market position, brand & distribution - Lancashire

Since inception, Lancashire has believed it is key that we are recognised as a major market and expert within our product lines

2014 broker income

Number of brokers we do business with

- Lancashire writes a limited number of classes with a well defined appetite in each e.g. Energy – Worldwide Offshore and Gulf of Mexico Wind; Marine – High-value fleets, War, Mortgagees Cover, etc
- This means that Lancashire can focus on niche products and bring to bear market leading capacity and expertise
- Brokers will follow the line of least resistance, and Lancashire’s capacity ensures that we see business early on when placements are being structured
- The Lancashire philosophy of being a nimble, intelligent underwriter able to ignore emotion and focus on fundamentals means that we are the de facto leader of the post-loss market – demonstrated in, for example, New Zealand, Japan and Thailand

2014: Market position, brand & distribution - Cathedral

Each line of business uses specialist niche brokers

2014 broker income

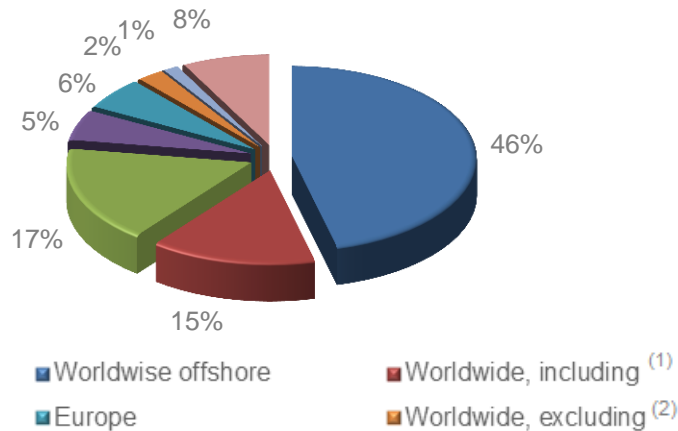

Number of brokers we do business with

- Diversity of producers means Cathedral holds more power than if writing just large broker books
- Niche focus of underwriting reflected in distribution channels
- Recognised underwriters with strong relationships often stretching back over decades

2014: Geographic distribution

Lancashire geographic analysis by risk location

Cathedral geographic analysis by risk location

- U.S. remains top source of income, as appropriate for market with largest insurance market and reinsurance spend
- Good spread of risk worldwide, especially with LUK energy offshore, Cathedral D&F and LICL international property catastrophe excess of loss

⁽¹⁾ Worldwide, including the U.S. and Canada, comprises insurance and reinsurance contracts that insure or reinsure risks in more than one geographic area

⁽²⁾ Worldwide, excluding the U.S. and Canada, comprises insurance and reinsurance contracts that insure or reinsure risks in more than one geographic area, but that specifically exclude the U.S. and Canada.

Kinesis Capital Management Indicative Results

	Mean loss scenarios (10% EL)		No loss scenarios	
	Limit of \$500m ⁽¹⁾	Limit of \$1B ⁽¹⁾	Limit of \$500m ⁽¹⁾	Limit of \$1B ⁽¹⁾
Lancashire investment (\$m) ⁽²⁾	38.3	76.5	38.3	76.5
RoL (net)	23.5%	23.5%	23.5%	23.5%
RoE contribution, <u>excluding</u> PC ⁽³⁾	0.5%	1.3%	0.7%	1.7%
RoE contribution, <u>including</u> PC ⁽³⁾	0.9%	2.1%	1.7%	3.6%
<u>Current year earnings (\$m)</u> ⁽¹⁾				
Underwriting fees - 8.5% of NPW	9.4	18.8	9.4	18.8
G&A costs ⁽⁴⁾	(5.7)	(6.8)	(6.1)	(7.7)
LHL equity pickup ⁽⁵⁾	4.8	9.6	8.8	17.5
Net CY contribution to LHL, after NCI	7.6	19.6	11.2	26.7
<u>Subsequent year earnings (\$m)</u>				
Profit commissions ⁽⁶⁾	6.3	12.7	14.6	29.2
Total profit contribution	13.9	32.3	25.8	55.9

⁽¹⁾ Assumes 75% written at 1/1 and 25% at 1/7 from a standing start i.e.. no run-off earnings from prior years. Earnings patterns reflect the underlying risks attaching i.e. not straight line

⁽²⁾ LHL's investment is 10%, up to a maximum of \$100m invested

⁽³⁾ Indicative assuming LHL target cross cycle RoE of 13% over the risk free rate, actual contribution will vary depending on actual RoE produced

⁽⁴⁾ Staff levels increase as limits increase; bonuses increase as total profit contribution increases: bonuses subject to caps

⁽⁵⁾ NPW less UW fees less losses less PC x 10% investment (subject to cap). PC provision is included in Kinesis Re in year 1 but not recognised as income by KCM until year 2. Equity pickup ignores capital returns to LHL

⁽⁶⁾ Calculated as 16.5% after a 5% capital charge and recognised on a lag depending on loss experience

Fee income

Kinesis

- Earned \$6.2 million of underwriting fees in 2014 plus a \$4.7 million equity pick-up on LHL's 10% investment in Kinesis Holdings
- Profit commissions of \$5.1 million earned in Q1 2015 on January and February 2014 underwriting cycles with an additional \$0.7 million expected in Q2 2015
- \$4.8 million of underwriting fees booked on January 2015 underwriting cycle on limit sold of \$262 million
- Assuming a mean loss scenario on 2015 contracts this would result in approximately \$3.6 million of profit commission in 2016. A no loss scenario would equate to \$8.7 million

Cathedral

- Cathedral earned profit commissions and managing agent fees of \$10.1 million in 2014

Accordion

- Profit commission of \$6.7 million received in 2014, recorded as commission income

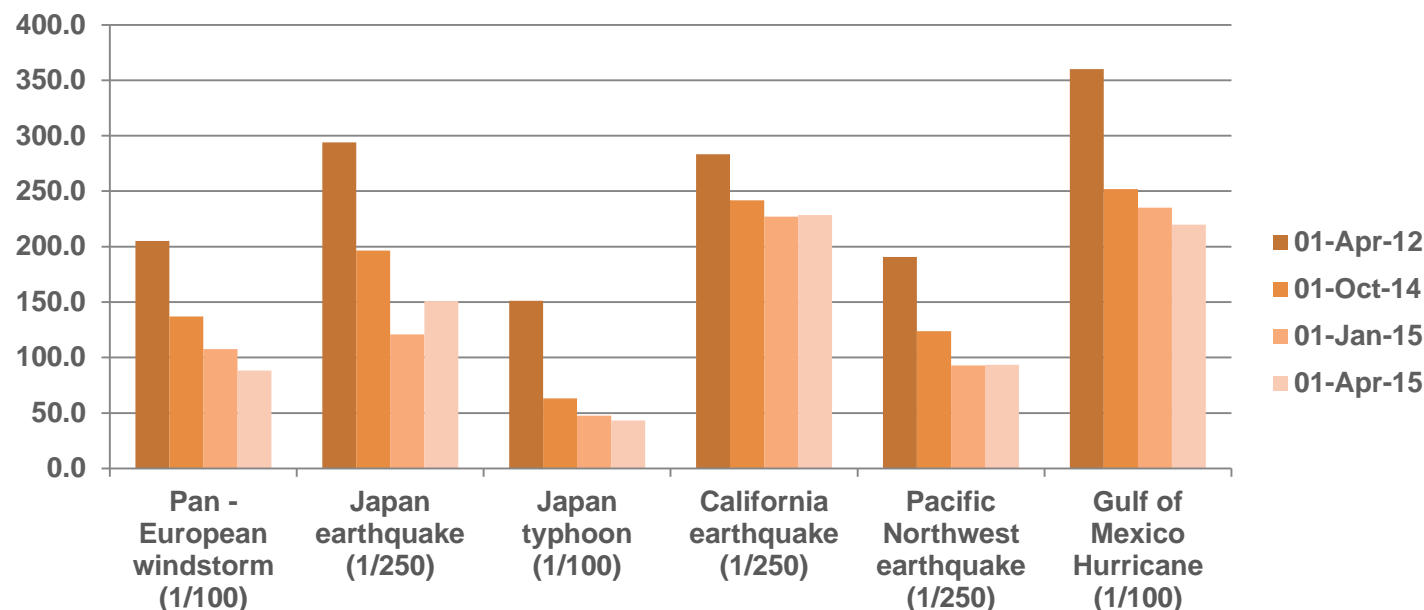

Saltire

- Profit commission of \$3.0 million was received in early 2014

Effectively balance risk and return

Managing the Cycle – reducing net exposures

- Since April 2012, which was the high-tide mark of the pricing cycle, the Group has reduced PMLs across all key exposures, in spite of the addition of Cathedral
- PMLs are not perfect predictors of losses but they do provide consistent measures of catastrophe risk levels

The Group has developed the estimates of losses expected from certain catastrophes for its portfolio of property and energy contracts using commercially available catastrophe models, which are applied and adjusted by the Group. These estimates include assumptions regarding the location, size and magnitude of an event, the frequency of events, the construction type and damageability of property in a zone, and the cost of rebuilding property in a zone. Return period refers to the frequency with which losses of a given amount or greater are expected to occur

Gross loss estimates are net of reinstatement premiums and gross of outward reinsurance, before income tax. Net loss estimates are net of reinstatement premiums and net of outward reinsurance, before income tax

The estimates of losses above are based on assumptions that are inherently subject to significant uncertainties and contingencies. In particular, modeled loss estimates do not necessarily accurately predict actual losses, and may significantly deviate from actual losses. Such estimates, therefore, should not be considered as a representation of actual losses and investors should not rely on the estimated exposure information when considering investment in the Group. The Group undertakes no duty to update or revise such information to reflect the occurrence of future events

Exposure management – Increasing RI purchases

Lancashire first loss XL limit 2012 vs 2015

*2015 Non-US property deductible eroded by year to date Energy loss

First loss limit purchased by Lancashire on an excess of loss basis, excluding ILWs, quota shares, cessions to side cars, facultative purchases and reinstatements
Excludes Cathedral's reinsurance

Exposure management – Increasing RI purchases

Cathedral first loss XL limit 2014 vs 2015

First loss limit purchased by Cathedral on an excess of loss basis, excluding ILWs, quota shares, cessions to sidecars, facultative purchases and reinstatements. Syndicate 3010 comparison 1/1/14 to 1/1/15. Excludes Lancashire's reinsurance

Managing the Cycle – strong weighting to low-attribution classes

Accident year attritional loss ratios – 5 year average

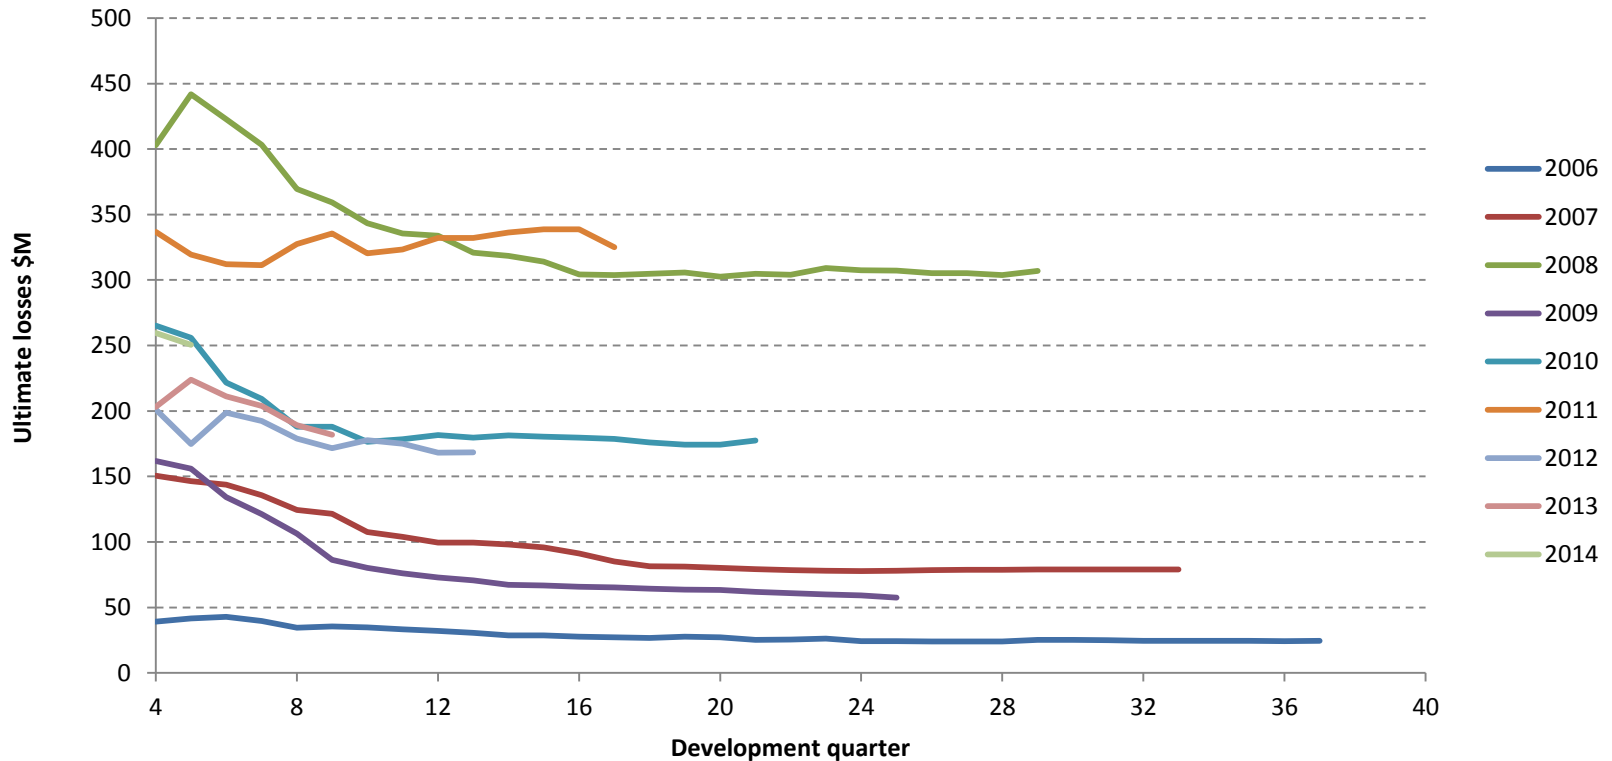

- Carefully balance classes with known attritional exposure (energy, marine, lower layer cat xl) with low attrition exposures (terrorism, AV52, higher layer cat xl)
- In a softening market Lancashire can absorb price deterioration better than its peers coming from such a low attritional base

Source: D&P analysis 2010-2014 ratios are as reported adjusted for disclosed catastrophe and prior year reserve development

Reserve adequacy

Ultimate development by accident year – LUK/LICL/CUL combined*

Ultimate Development by Accident Year - Group

*Cathedral Underwriting Limited data calculated from time of acquisition

Effectively balance risk and return – conservative investment philosophy

- **Our market outlook remains subdued:**
 - While the U.S. economy continues to improve, inflation remains muted and global growth remains depressed
 - Central bank policies, geopolitical events, and oil price volatility continue to exacerbate risk in the global economy
- **Preservation of capital continues to be paramount and we will focus on interest rate risk**
 - Maintain reduced investment portfolio duration as U.S. interest rates are expected to rise later this year
 - Mitigate interest rate risk:
 - ✓ Increased exposure to floating rate notes and non-fixed income asset classes
 - ✓ Hold an allocation to a low volatility hedge fund portfolio, diversifying the overall investment portfolio
 - ✓ Treasury future overlay used to protect the investment portfolio from a rise in interest rates with a short five-year treasury futures position, reducing duration by 0.3 years
 - Continue monitoring risk/return trade off in the portfolio:
 - ✓ Continue to manage the risk on/risk off balance with a skew towards a risk on environment with anticipation of a rising rate environment and U.S. economic growth

Effectively balance risk and return

Capital preservation and interest rate risk management

(1) Other includes fixed income funds, fixed income - at fair value through profit and loss, equity securities and other investments

(2) For 2014, Lancashire's net returns are included for the period from April through December 2014. Pro-forma hedge fund returns have been used for the period from January – March 2014

Operate nimbly through the cycle

Operate nimbly through the cycle

weighted average dividend yield ⁽⁴⁾	15.2%	n/a	18.1%	18.0%	8.4%	8.3%	12.3%	17.8%	6.5%	n/a

234.1% of original IPO share capital has been returned to shareholders ⁽⁵⁾

⁽¹⁾ Dividends included in the financial statement year in which they were recorded

⁽²⁾ Ratio of price paid compared to fully converted book value per share

⁽³⁾ Price to FCBVS is calculated as the year end share price divided by the year end fully converted book value per share. 2015 is based on the share price at March 31, 2015 and fully converted book value at March 31, 2015

⁽⁴⁾ Dividend yield is calculated as the total calendar year cash dividends divided by the year end share price. 2015 dividend yield is based on the share price at March 31, 2015 and includes the special dividend of \$0.50 per common share and final dividend of \$0.10 declared on February 12, 2015

Financial flexibility - Capital management

Constant adjustment of capital

an example over 12 months

Excess capital builds during the year if profits exceed share repurchases & ordinary dividends

Review of stress tests and approval of business plan with capital projection at the November Board meetings

Our target capital headroom increases in hurricane season absent significant losses *

Special dividend in Q1 if capital not utilised at 1/1 renewals and insufficient opportunities ahead

Share repurchases continuous if excess capital exists and price acceptable

Special dividend in Q4 if insufficient opportunities ahead some capital withheld if outlook uncertain

* In the event of e.g. a major U.S. windstorm, we may raise equity to take advantage of post loss opportunities

other factors: capital cost and availability, future opportunities, clarity of trading conditions, time of year, share price

Managing the cycle - dividend yield (1)

(1) Dividend yield is calculated as the total calendar year cash dividends divided by the year end share price. Dividends include recurring dividends, special dividends and B shares issuances. Source: Bloomberg

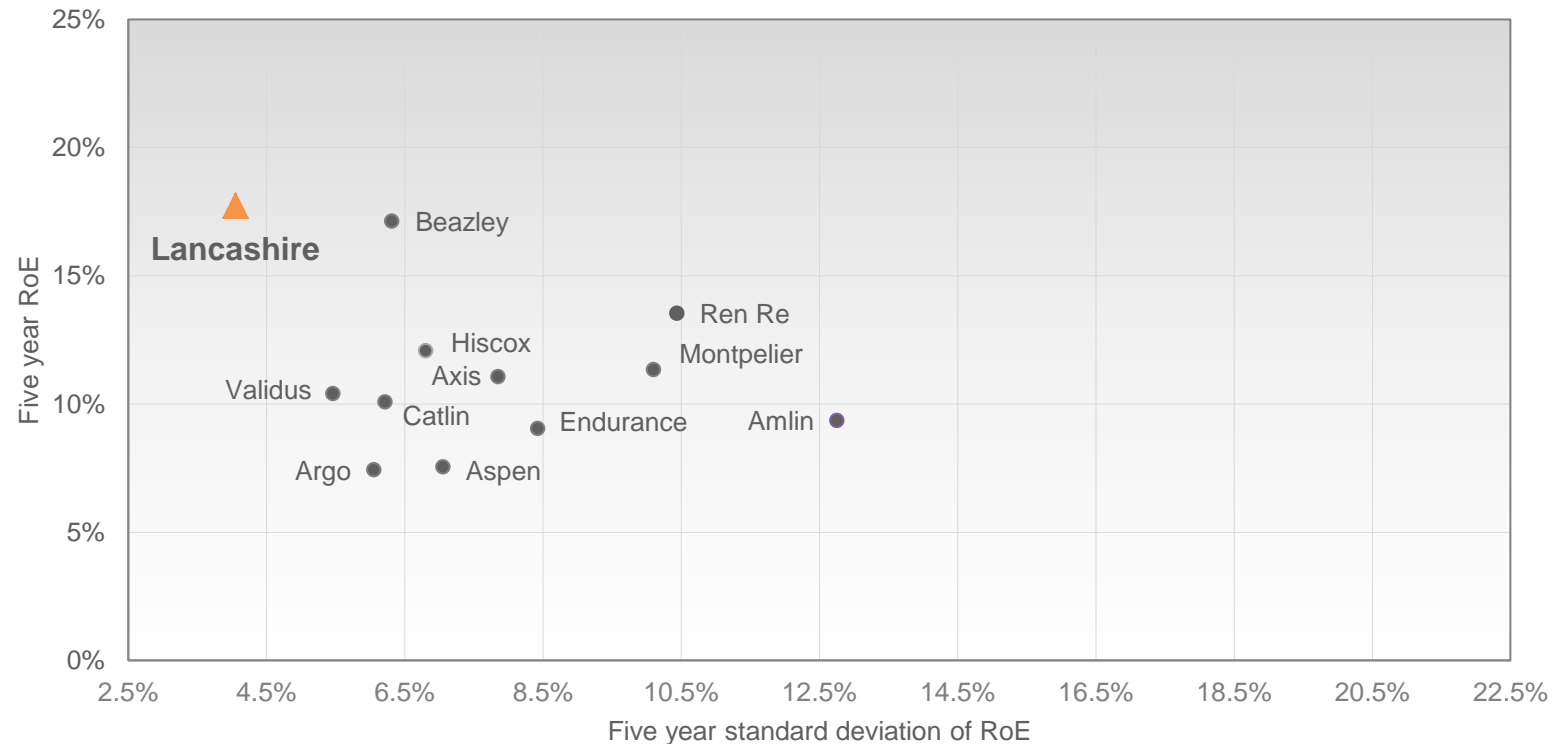

(2) Sector includes Amlin, Argo, Aspen, Axis, Beazley, Catlin, Endurance, Hiscox, Montpelier, Renaissance Re and Validus

(3) 5 year average based on the 2010 to 2014 reporting periods

Cross cycle consistency - RoE

five year standard deviation⁽¹⁾ in RoE

- Lancashire has one of the best performances and yet the lowest volatility versus peers
- Evidence of adherence to business plan and strong risk management and a proven, successful cross-cycle strategy

⁽¹⁾ Standard deviation is a measure of variability around the mean

⁽²⁾ Compound annual returns for Lancashire and sector are from January 1, 2010 through December 31, 2014. RoE calculated as the internal rate of return of the change in FCBVS in the period plus dividends accrued. For Amlin, Beazley, Catlin, Hiscox and Ren Re, basic book value per share is used as FCBVS is not reported by these companies. Source: Company reports

Conclusion

Conclusion

- Lancashire has one of the **best performances** and yet the **lowest volatility** in the London and Bermudian markets
- Our strategy is designed to cope with hard and soft markets, managing capital and exposures to provide superior risk-adjusted returns across the cycle
- Group management is fully integrated and has decades of experience in rated company, Lloyd's and collateralised markets
- Group profitability is not overly dependant on property reinsurance, with strong weightings to speciality classes with proven RoE potential and low attritional loss ratios
- A well-diversified portfolio across multiple lines and geographies as a base to trade across the cycle
- Third party capital vehicle well established and growing investor and client base
- Opportunities to grow in non- or low-correlated lines within Syndicate 3010
 - ✓ In 2014 Lloyd's approved (and we are writing) Lancashire-led energy and terror lines in Syndicate 3010
 - ✓ Lloyd's has approved (and we are writing) specialty aviation and war (supported by the Lloyd's consortium) and general specialist aviation business, with market leading teams

Appendices

Lancashire: Property catastrophe reinsurance

Mitigating impact of falling rates

- We bought retrocession with a reinstatement to cover us for two losses attaching \$50m lower than the aggregate program last year
- We have a facility ceding some of our top lines where we typically have our largest exposures on a quota share basis. We keep 50% of the premium for 90%+ of the risk ceded. (We keep the second event on our book)
- We have a new 15% quota share for our North East portfolio. Earning fee income on this with override and PC

Ability to compete

- Offer reinstatement (We don't need fronting)
- Willing to offer more multi-layer support to the program where pricing is adequate but always expose largest capacity to top layers
- The top line facility keeps us relevant for our clients and brokers

Outlook

Cat XL – USA

- Continue to be a relevant regional U.S. market player; continue to have limited Florida exposures

Cat XL – Asia

- Japan renewals were in line with expectations. Moved our capacity further away from historical losses as some clients bought more at the top of their programs

Cat XL – Rest of world

- In Europe, prepaid reinstatements being introduced was fairly common, from 1 @ 100%. Our top layer positions are largely insulated from this as the probability of reinstating is slight
- Canada, we greatly reduced our aggregate position. Don't plan major shift in book going forward

Lancashire: Energy

Mitigating impact of falling rates

- Relatively low attritional loss ratios
- Deepwater GOM portfolio still requires high limits
- Good premium base from prior years but oil price issues affecting activity levels across the oil & gas industry
- Clients focused on cost reduction rather than drilling and construction
- Reduced activity = reduced exposure
- Increased reinsurance protection at January 1, 2015, including GOM wind
- Lloyd's platform has helped maintain shares on key business by offering a more flexible way to trade
- Spot facultative purchases to improve risk adjusted return and volatility

Ability to compete

- Large lines make us a relevant and important component of leadership panel
- We have the capability and willingness to lead business
- We provide transparency, good service, quick turnaround and excellent claims service
- We have developed direct cross-class client relationships that overarch broker relationships
- Market leader for Deepwater GOM and Excess Construction
- Offering excess third party liability and Lloyd's capacity protects signings on risk packages and offers flexibility to clients and brokers alike

Outlook

Gulf of Mexico

- Demand likely to be impacted by volatile oil price but essential balance sheet protection and lender-driven purchasing will offer some mitigation
- Locked in pricing with a limited number of selected longer term contracts will continue

Worldwide offshore

- Coming off historically high rating but still profitable margin within core business
- Drilling and exploration levels will continue to be reduced as industry adjusts to new oil pricing levels
- Focus on industry cost reduction could impact on claims

Excess third party liabilities

- A selective portfolio with established known clients and still good demand for excess layers with robust pricing

General

- Leverage across sub-classes and platforms (i.e. Syndicate 3010) gives the group flexibility to trade and remain relevant

Lancashire: Property terrorism and political violence

Mitigating impact of falling rates

- TRIPRA uncertainty reinforced strengths of stand-alone market and is likely to reinforce U.S. demand
- Terrorist attacks and the growth of IS and Boko Haram keep the peril high up in the headlines
- Lancashire/Cathedral will remain pragmatic and stick with the core book
- We continue to experience a low attritional loss ratio
- Increased reinsurance protection at January 1, 2015, taking advantage of attractive pricing and capacity to reduce retention on non-metro business

Ability to compete

- Large lines make us relevant and dangerous to ignore as a quoting market to other brokers
- We have the ability and willingness to lead business
- We provide transparency, good service, quick turnaround and excellent claims service
- We have developed many cross-class relationships with insureds
- We write our own layers - not led by Lloyd's or other capacity; in fact about 16% of our layers are "private" layers

Outlook

Terrorism

- More competition with new capacity but demand still strong with a good flow of new business opportunities
- We are witnessing the growth of "automatic" facilities for smaller programs. We have declined to participate on most of these due to lack of underwriting control and management of aggregates
- Syndicate 3010 has given another access point to the Lancashire Group for brokers. Syndicate 3010's business plan has also broadened the Group's appetite for looking at more diverse risk profiles and at possible lower attachment points

Lancashire: Property political and sovereign risk

Mitigating impact of falling rates	Ability to compete
<ul style="list-style-type: none">• Strong interest for political and sovereign risk product across territories represented by a continued high submission flow• Demand driven by increased perception of threat of political and sovereign risk from geo-political events, such as the Russia/Ukraine conflict and volatility in commodity prices but offset somewhat by oil price decline• Increased client awareness of the importance of the PR/sovereign insurance products in providing regulatory and capital relief and balance sheet protection• Development of new client relationships, for example with Export Credit Agencies and Multilaterals, which provide access to new business flows across new territories• Proactive and dynamic portfolio management enables us to maximise the efficiency of our capacity	<ul style="list-style-type: none">• We have the ability and willingness to lead business• We provide transparency, good service, quick turnaround and excellent claims service• We have developed direct client relationships that overarch broker relationships• We write our own layers - not led by Lloyd's capacity• Lancashire's tenor and non-trade related capabilities are in demand from our clients and provide us with opportunities that other markets are unable to consider
Outlook	
<p>Political Risk / Sovereign Risk</p> <ul style="list-style-type: none">• Global demand for the product lines, growing in some markets as awareness develops however oil price does limit demand in some areas of the portfolio• Market capacity continues to increase, but Lancashire's capabilities insulate it from some of the competitive pressures• In a challenging global environment Lancashire's traditional strengths of underwriting discipline and risk selection will remain at the core of the portfolio	

Lancashire: Marine

Mitigating impact of falling rates	Ability to compete
<ul style="list-style-type: none">• We write the risks with large limit requirements which are more insulated from the lows of rating trend in respect of Hull• Generally for our portfolio rates are better than the market norm due to a loyal client base and specialist niches we predominate• Increased reinsurance protection at January 1, 2015• Focus on ancillary classes such as war, builders risk, MAP and MII with less competition	<ul style="list-style-type: none">• Large lines make us relevant and dangerous to ignore as a quoting market to brokers• We have an ability and willingness to lead business• We provide transparency, good service, quick turnaround and excellent claims service
Outlook	
<p>Marine</p> <ul style="list-style-type: none">• Hull market relatively stable, albeit still modest softening for clean business with modest increases on loss-making accounts• Still too much capacity for small to medium tonnage• LUK portfolio has withstood recent spate of losses due to nature of portfolio	

Lancashire: Aviation and satellite

Mitigating impact of falling rates

AV52

- No attritional losses ever
- Large line size therefore all opportunities made available and one stop shop makes brokers lives easier
- Increased reinsurance protection in 2014, taking advantage of attractive pricing and capacity and reducing retention. Maintained in in 2015 with the addition of U.S airlines

Satellite

- Track the market with small net lines
- Loss activity has done little to temper reductions – over supply of capacity

Ability to compete

- Large lines on AV52 make us relevant and dangerous to ignore as a quoting market to other brokers
- We have the ability and willingness to lead business including lineslips
- We provide transparency, good service and quick turnaround

Outlook

Aviation

- Market plateaued during 2014 following hull war losses with minimal downward pressure towards the end of Q4 2014. AV52 market capacity remains stable
- Risk profile remains attractive and passenger numbers picking up so demand remains strong
- New business came to the market during 2014 in the guise of U.S. Airlines not previously placed in the commercial market

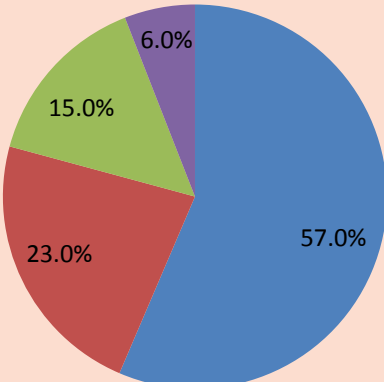

Satellite

- Launch rates generally on the decline in the launch and in orbit segments

Cathedral: Aviation reinsurance & satellite

Core

Airline XL - Core part of the account exposed to major catastrophes but aggregate focused on small to medium size direct insurers enabling better portfolio management

General Aviation XL - Catastrophe reinsurance covering corporate and private jets, small local airports and small product makers

Aviation war - covers both Hull and War Third Party. Different to Lancashire's 'AV52' book as the focus is on non major risk writers.

Proportional - down to 3 direct clients that have a good track record in niche areas with long standing relationships

Non-core / Opportunistic

Bigger direct clients

- No pay back / do they need to buy?
- Market share

Potential proportional clients

Take advantage of relationships if there is a capacity crunch in the future

Whole account – currently a very small account generally used as a fact finder exercise but could grow in a harder market

Outlook

- Still too much capacity – cheap pricing and poor portfolio management will however accelerate the pain and the correction thereafter
- Inconsistency in pricing will continue as entities seek to aggressively assume aggregate
- Companies with limited track record looking for market share
- Increased competition to lead business
- Brokers becoming concerned about longevity of client base and revenue stream

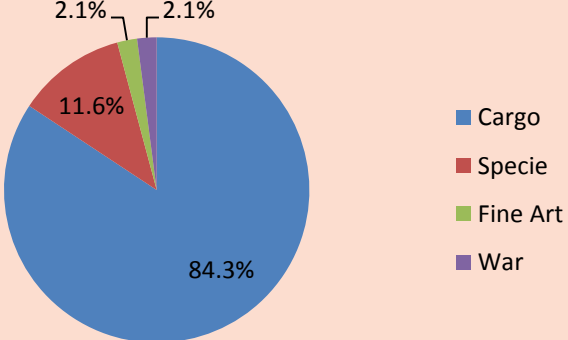

Portfolio management - Market rating index versus Cathedral net income / profitability

Cathedral: Aviation direct & war

Aviation Hull & Liabilities	Market Support
<ul style="list-style-type: none"> Established market leading team in General Aviation (particularly rotor-wing) and lower tier Airlines Team is getting good broker and client support despite adding another market to a congested space We have reduced our initial business plan in the rotor-wing area due to very active broker lineslips and deteriorating underwriting conditions Have secured leads on key long standing accounts at client or broker request and airline business is stable and on plan 	<p>Consortia</p> <ul style="list-style-type: none"> Our War underwriting is conducted for us and on behalf on a number of leading Syndicates in Lloyd's by the aviation war team We have 3 consortia arrangements, for Airline, Large GA and GA where participants pay fees and profit commissions <p>Reinsurance</p> <ul style="list-style-type: none"> Despite being start ups in heavily subscribed markets both teams have in place reinsurance arrangements to protect their net accounts with good support from the market
Aviation War	Outlook
<ul style="list-style-type: none"> Established Open market leading team arrived to backdrop of huge losses after a benign claims activity Expected huge reaction muted by multiples of capacity required being held and increased on broker line-slips Target key airline leads have transferred to us Key non-airline and hot spot business in which we specialise is seeing decent increases Clients still require bespoke expertise which is in short supply Losses have continued in 2015 to broker line-slips and some markets are looking to pull out 	<ul style="list-style-type: none"> Both accounts are re-building their long standing accounts in heavily oversubscribed market places Both are receiving good support from long standing clients and will build out at their own pace The markets are currently dominated by passive capacity paying significant fees to participate in broker facilities which have shown poor results and leave little margin for losses Both accounts can be volatile and we have the expertise to fully capitalise at the right moment

Cathedral: Cargo

Core	Non-core / Opportunistic										
<p>Marine Cargo</p> <ul style="list-style-type: none"> Established, relationship driven, higher quality, marine cargo accounts with proven profitability and good risk management Complementary rather than clashing exposures and territories Non Catastrophe exposed transits of commodities and raw materials Loyal core book – many being renewals of 20+ years Globally diverse book with specific focus on non over-broked territories Non 'large-broker' book of relationship business <p>Fine Art - Private collections and museums with good risk management in non catastrophe exposed areas</p> <p>Specie –Vault</p>	<p>Marine Cargo</p> <ul style="list-style-type: none"> Cargo stock-throughput – where non catastrophe exposed Cargo consequential loss War on land and cargo insurance in territories of civil unrest Logging equipment in Canada and Australia. <p>Specie</p> <ul style="list-style-type: none"> Excess cash in transit (typically excess of any transit exposure) 										
Outlook	Portfolio distribution										
<p>Marine Cargo</p> <ul style="list-style-type: none"> Still too much capacity chasing large, high profile, catastrophe exposed accounts. Over developed markets remain flat but good opportunities remain in territories such as Africa Profitable niche opportunities 	 <p>A pie chart illustrating the portfolio distribution across four categories. The largest segment is Cargo at 84.3%, followed by Specie at 11.6%. Both War and Fine Art represent 2.1% each.
