LANCASHIRE HOLDINGS LIMITED

29 July 2020

Hamilton, Bermuda

Lancashire Holdings Limited ("Lancashire" or "the Group") today announces its results for the six months ended 30 June 2020.

Highlights:

- Resilient business model and operational capabilities despite COVID-19 global disruption; high productivity maintained.
- Gross premiums written increased by 15.3% year on year to \$495.5 million, ahead of rate, with the Group Renewal Price Index of 111%.
- Strong underlying underwriting performance, with a combined ratio of 88.9% absent the COVID-19 loss estimate (106.9% including COVID-19).
- Investments rebounded in Q2, resulting in total net investment return of 1.3% for the six months ended 30 June 2020.
- Interim dividend of \$0.05 per common share.

Alex Maloney, Group Chief Executive Officer, commented:

"The global COVID-19 pandemic has presented a difficult set of threats to our health, our societies and our economies which remain both fluid and uncertain.

Once again, I would like to thank all of our people at Lancashire for showing their continued creativity and commitment, which has been so central to demonstrating a robust operational flexibility and resilience, since successfully moving to a home working environment in March 2020. This nimble "can do" culture within our business has given Lancashire the resources to continue to meet the needs of our clients and their brokers against this unprecedented backdrop. Our underlying business has performed very well during this period and we have been able to respond rapidly to take advantage of the improving (re)insurance market, generating a 15% increase in gross premiums written in the first half of the year.

In the face of the challenges generated by the COVID-19 pandemic to both sides of the balance sheet, there has been a retrenchment in (re)insurance market risk capital and capacity. In the year to 30 June 2020, we have witnessed double-digit percentage rate increases in many of our lines of business and accelerated rating dislocation in the catastrophe exposed reinsurance lines, resulting in rises in the range

of 20%-30% for 1 June renewals in Florida. I believe that the economic fundamentals now dictate that this pricing trend is likely to strengthen throughout 2020 and into 2021 across a number of our business lines, and that current market conditions present an attractive opportunity for growth consistent with our strategy of deploying capital in line with the insurance market cycle.

We were pleased to have executed a successful equity capital raise as announced on 10 June 2020. We took this step to allow us to deploy capital to take advantage of the growth opportunities presented by the improving pricing environment. I would like to thank our existing and new shareholders for their strong support for the capital raise.

The effects of COVID-19 as a loss event to the insurance and reinsurance markets remain both ongoing and uncertain. For Lancashire, the current estimated impact of the COVID-19 loss event has been assessed consistent with our usual internal processes for deriving ultimate loss estimates, albeit that there is higher uncertainty with this event. During the second quarter of 2020, we increased our COVID-19 loss estimate to approximately \$42 million, from approximately \$35 million, net of reinsurance and reinstatement premiums. As noted in the our Q1 trading statement, Lancashire does not write the following lines of business: travel insurance; trade credit; accident and health; Directors' and Officers' liability; medical malpractice; and long-term life. The Group also has minimal exposure to mortgage business and is exposed to a small number of event cancellation contracts.

In a rapidly changing market, we are seeing attractive opportunities to develop many of our existing lines of business and to establish new ones. Our business is well positioned to grow our underwriting portfolio and to develop opportunities to improve the risk adjusted returns for our business and our investors."

Natalie Kershaw, Group Chief Financial Officer, commented:

"For the first half of 2020 we generated an underwriting profit of \$39.4 million and an overall comprehensive loss of \$14.7 million. Our financial results were impacted by the COVID-19 losses, plus a number of late reported attritional claims from prior years. Excluding COVID-19 we did not incur any new major losses in the first half of the year and we have seen significant premium growth across all our underwriting segments. Our investment strategy remains conservative and whilst our portfolio was impacted by the volatility which occurred during the first quarter of 2020 as a result of the global pandemic, I am pleased to note that for the year to 30 June 2020 our portfolio recovered to generate a positive return of 1.3%.

In line with our stated ordinary dividend policy, on 28 July we declared an ordinary interim dividend of \$0.05 per share."

Total	495.5	429.6	65.9	15.3	111	

Gross premiums written increased by 15.3% in the first six months of 2020 compared to the same period in 2019. The Group's four principal segments, and the key market factors impacting them, are discussed below.

The increase in property gross premiums written was driven primarily by new business across all of the property classes, with rate and exposure increases also a strong contributor to the growth. Compared to the prior year, the second quarter renewal season was particularly strong, and saw the Group benefit from the hardening pricing environment. This contributed to significant growth in the property catastrophe class of business in the second quarter. These increases were partially offset by a reduction of premiums in the political risk class, which is largely a non-renewing book, plus a reduced level of reinstatement premium compared to the same period in 2019.

Energy gross premiums written increased primarily due to new business and rate and exposure increases in the upstream energy, downstream energy and power classes of business.

The increase in marine gross premiums written was primarily due to rate and exposure increases across all lines of business supported by new business growth in the marine cargo and the marine hull classes of business. The marine segment also benefited from exposure increases on policies bound in prior underwriting years.

Although the first half of the year is not a major renewal period for the aviation segment, we saw a significant increase in gross premiums written primarily due to new business and rate increases in the aviation deductible and the aviation hull and liability classes of business, as well as exposure increases on policies bound in prior underwriting years in the AV52 class.

Ceded reinsurance premiums increased by \$6.0 million, or 2.9%, in the first six months of 2020 compared to the same period in 2019. The increased spend was primarily due to cover purchased for newer classes of business. There was also increased outwards quota share reinsurance spend as a result of the higher inwards gross premiums written in the associated classes of business. These increases were largely offset by lower outwards reinstatement premiums compared to the prior year and a lower ceding percentage applied on some of the outwards quota share contracts purchased.

The Group's net loss ratio for the first six months of 2020 was 57.4% compared to 34.5% for the same period in 2019. The accident year loss ratio for the first six months of 2020, including the impact of foreign exchange revaluations, was 55.4% compared to 40.5% for the same period in 2019. Excluding the impact of COVID-19, the Group's net loss ratio was 40.0% and the accident year loss ratio was 38.2%.

As at 30 June 2020, the Group's COVID-19 ultimate loss estimate, net of reinsurance and reinstatement premiums, amounted to approximately \$42 million. This arose primarily from exposures within our property segment. Given the ongoing nature of the COVID-19 pandemic and the uncertain impact on the insurance industry, the Group's actual ultimate loss may vary, perhaps materially, from the current estimate. The final settlement of all of these claims is likely to take place over a considerable period of time.

Prior year unfavourable development for 2020 was \$5.1 million, compared to \$15.9 million of favourable development for the same period in 2019. The unfavourable development during the first six months of 2020 was primarily driven by a number of late reported losses from the 2019 accident year, reserve deterioration on a couple of marine claims in the 2017 and 2019 accident years, in addition to adverse development on the 2010 New Zealand earthquake in the property segment. The favourable development during the first six months of 2019 was primarily due to general IBNR releases across most lines of business, offset somewhat by 2018 accident year claims in our property and energy segments.

The table below provides further detail of the prior years' loss development by class, excluding the impact of foreign exchange revaluations.

The ratio of IBNR to total net loss reserves was 34.8% at 30 June 2020 compared to 34.8% at 30 June 2019.

Investments

Net investment income, excluding realised and unrealised gains and losses, was \$14.9 million for the first six months of 2020, a decrease of 24.0% from the same period in 2019. Total investment return, including net investment income, net other investment income, net realised gains and losses, impairments and net change in unrealised gains and losses, was a gain of \$22.0 million for the first six months of 2020 compared to a gain of \$57.1 million for the first six months of 2019.

The Group's investment portfolio returned 1.3% for the first six months of 2020. As previously reported, the first quarter of 2020 produced a negative investment return of 1.9% given market volatility due to the COVID-19 pandemic, which then largely reversed in the second quarter resulting in quarterly gains of 3.3%. The second quarter gains were seen across all asset classes that benefited from significant U.S. fiscal stimuli. Fixed maturities recouped all of the losses from the first quarter, with hedge funds, bank loans and private debt funds still showing small losses on a year to date basis.

Returns in the first six months of 2019 were driven by a strong equity market combined with both a decrease in treasury yields and a narrowing of credit spreads. This resulted in positive performance in all asset classes, particularly in the bank loan, equity and hedge fund portfolios.

The managed portfolio was as follows:

	As at	As at	As at
	30 June 2020	31 December 2019	30 June 2019
Fixed maturity securities	81.0%	79.0%	82.1%

Key investment portfolio statistics for our fixed maturities and managed cash were:

	As at	As at	As at

Market yield	1.1 %	2.1 %	2.4 %

Third Party Capital Management

The total contribution from third party capital activities consisted of the following items:

	Six months	ended
	2020	2019
	\$m	\$m
Lancashire Capital Management underwriting fees	2.7	1.9
Lancashire Syndicates' fees & profit commission	0.8	0.9
Total other income	3.5	2.8
Share of profit of associate	1.1	0.1
Total net third party capital management income	4.6	2.9

The higher Lancashire Capital Management underwriting fees in 2020 reflect the increased level of premiums under management compared to 2019. The share of profit of associate reflects Lancashire's equity interest in the Lancashire Capital Management managed vehicle.

Other operating expenses

Other operating expenses were \$55.1 million in the first six months of 2020 compared to \$50.8 million in the first six months of 2019. An increase in headcount, general salary increases and variability around incentive pay led to an increase in employment costs. This was partly offset by a reduction in other operating expenses and the favourable impact from the depreciation of Sterling foreign exchange rates relative to the prior period.

Equity based compensation

The equity based compensation expense was \$7.0 million in the first six months of 2020 compared to \$3.8 million in the first six months of 2019. The equity based compensation charge was driven by anticipated vesting levels of active awards based on current performance expectations.

Capital

On 10 June 2020 a total of 39,568,089 new common shares in Lancashire were placed at a price of 700 pence per share, raising proceeds of \$340.3 million for the Company. The shares issued represented approximately 19.5% of the issued common share capital of Lancashire prior to the placing.

As at 30 June 2020, total capital available to Lancashire was \$1.830 billion, comprising shareholders' equity of \$1.506 billion and \$323.7 million of long-term debt. Tangible capital was \$1.675 billion. Leverage was 17.7% on total capital and 19.3% on total tangible capital. Total capital and total tangible capital as at 30 June 2019 were \$1.445 billion and \$1.291 billion respectively.

Alternative Performance Measures

As is customary in the insurance industry, the Group also utilises certain non-GAAP measures ("Alternative Performance Measures" or "APMs") in order to evaluate, monitor and manage the business and to aid users' understanding of the Group. In compliance with the Guidelines on APMs of the European Securities and Markets Authority, we give information on APMs in the table below. This information has not been audited.

Management believes that the APMs included in this release are important for understanding the Group's overall results of operations and may be helpful to investors and other interested parties who may benefit from having a consistent basis for comparison with other companies within the industry. However, these measures may not be comparable to similarly labeled measures used by companies inside or outside the insurance industry. In addition, the information contained herein should not be viewed as superior to, or a substitute for, the measures determined in accordance with the accounting principles used by the Group for its audited consolidated financial statements or in accordance with GAAP.

The following APMs included in this release have not been prepared in accordance with the accounting principles used by the Group for its audited and / or interim consolidated financial statements. Below is an explanation of the definition of these APMs as well as information regarding their relevance:

APM	Definition	Relevance
Net loss ratio	Ratio, in per cent, of net insurance losses to net premiums earned.	This ratio gives an indication of the amount of claims expected to be paid out per \$1.00 of net premium earned in the financial year.
Net acquisition cost ratio	Ratio, in per cent, of net insurance acquisition expenses to net premiums earned.	This ratio gives an indication of the amount expected to be paid out to insurance brokers and other insurance intermediaries per \$1.00 of net premium earned in the financial year.
Net expense ratio	Ratio, in per cent, of other operating expenses, excluding restricted stock expenses, to net premiums earned.	This ratio gives an indication of the amount of operating expenses expected to be paid out per \$1.00 of net premium earned in the financial year.
Accident year loss ratio	The accident year loss ratio is calculated using the accident year ultimate liability re-valued at the current balance sheet date, divided by net premiums earned.	This ratio shows the amount of claims expected to be paid out per \$1.00 of net premium earned in an accident year.
Combined ratio	Ratio, in per cent, of the sum of net insurance losses, net acquisition expenses and other operating expenses to net premiums earned.	The Group aims to price its business to ensure that the combined ratio across the cycle is significantly less than 100 per cent.

Fully converted book value per share (" FCBVS ") attributable to the Group	Calculated based on the value of the total shareholders' equity attributable to the Group and dilutive restricted stock units as calculated under the treasury method, divided by, the sum of all shares and dilutive restricted stock units, assuming all are exercised.	Shows the Group's net asset value on a diluted per share basis for comparison to the market value per share.
Return on equity (" RoE ") (RoE is also sometimes referred to as the change in FCBVS adjusted for dividends)	The internal rate of return of the change in FCBVS in the period, plus dividends accrued. Tangible RoE attributable to the Group excludes intangible assets from capital.	The Group's aim is to maximise risk adjusted returns for its shareholders across the cycle.
Total investment return	Total investment return measures investment income and net realised and unrealised gains and losses produced by the Group's managed investment portfolio.	The Group's primary investment objectives are to preserve capital and provide adequate liquidity to support the Group's payment of claims and other obligations. Within this framework the Group aims for a degree of investment portfolio return.

NOTE REGARDING RPI METHODOLOGY

THE RENEWAL PRICE INDEX ("RPI") IS AN INTERNAL METHODOLOGY THAT MANAGEMENT USES TO TRACK TRENDS IN PREMIUM RATES OF A PORTFOLIO OF INSURANCE AND REINSURANCE CONTRACTS. THE RPI WRITTEN IN THE RESPECTIVE SEGMENTS IS CALCULATED ON A PER CONTRACT BASIS AND REFLECTS MANAGEMENT'S ASSESSMENT OF RELATIVE CHANGES IN PRICE, TERMS, CONDITIONS AND LIMITS AND IS WEIGHTED BY PREMIUM VOLUME. THE RPI DOES NOT INCLUDE NEW BUSINESS, TO OFFER A CONSISTENT BASIS FOR ANALYSIS. THE CALCULATION INVOLVES A DEGREE OF JUDGEMENT IN RELATION TO COMPARABILITY OF CONTRACTS AND THE ASSESSMENT NOTED ABOVE. TO ENHANCE THE RPI METHODOLOGY, MANAGEMENT MAY REVISE THE METHODOLOGY AND ASSUMPTIONS UNDERLYING THE RPI, SO THE TRENDS IN PREMIUM RATES REFLECTED IN THE RPI MAY NOT BE COMPARABLE OVER TIME. CONSIDERATION IS ONLY GIVEN TO RENEWALS OF A COMPARABLE NATURE SO IT DOES NOT REFLECT EVERY CONTRACT IN THE PORTFOLIO OF CONTRACTS. THE FUTURE PROFITABILITY OF THE PORTFOLIO OF CONTRACTS WITHIN THE RPI IS DEPENDENT UPON MANY FACTORS BESIDES THE TRENDS IN PREMIUM RATES.
